CENTER FOR EVOLUTIONARY AND ENVIRONMENTAL BIOLOGY

BIODIVERSITY EXPLORER NAMED CHICAGO FUTURE LEADER

The Office of Academic Affairs is pleased to announce that **Ismial Morrar**, a participant in Biodiversity Explorers 1995, The Field Museum's summer internship program for high school juniors, has been selected to participate in Future Leaders Chicago. This is a new program for outstanding Chicago area high school juniors who have demonstrated strong community leadership and a commitment to volunteerism. The Chicago Community Trust, Golden Apple Foundation, Leadership Greater Chicago, Ronald McDonald Children's Charities and Voices for Illinois Children are sponsoring this program to build leadership skills and encourage community involvement among young people in Chicago.

The Field Museum nominated Ismial for Future Leaders Chicago based on his exceptional performance as a Biodiversity Explorers participant, and his involvement in school and community activities. Ismial is a junior at Kennedy High School, where he is ranked third in his class, is Captain of the football and tennis teams, First Board on the school chess team, and was Head Delegate from his school to Chicago's 1995 Model United Nations. Ismial was selected as one of thirty participants in this pilot program, after having been selected as one of eighty finalists from the more than 300 nominations received. Program participants will meet once a month in all day sessions from January – May 1995, and will have the opportunity to meet with prominent business, philanthropic, government, and religious leaders to learn how their organizations affect the community, make site visits to organizations throughout Chicago that have made an impact in their community, and be mentored by adults whose careers demonstrate the many ways to exercise community leadership. Congratulations Ismial!

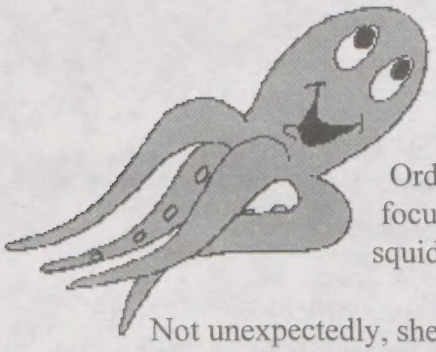
MUELLER AND STRACK RETURN FROM COSTA RICA

Greg Mueller and **Betty Strack** (Botany) spent three weeks (November 8-28) collecting in Costa Rica. A major goal for this trip was to initiate Greg's new project "Screening Costa Rican Macrofungi for Bioactive Compounds: Fungi from the Guanacaste Conservation Area." funded by the National Institutes of Health. This is a collaborative project with the Costa Rican National Biodiversity Institute (INBio) and the U.S. National Cancer Institute for testing Costa Rican fungi for potential anti-AIDS and anti-cancer compounds. Greg and Betty also sampled their permanent plots in the Talamanca Mountains in the central part of the country. To date they have collected nearly 200 species of macrofungi, mushrooms and related fungi, from one 1000 square meter (1/4 acre) plot. This work is part of Greg's National Science Foundation funded project to inventory the macrofungi of the oak

forests of Costa Rica.

NOON BALLOON

The Noon Balloon presentation for Tuesday December 5, 1995 was delivered by **Janet Voight,** Assistant Curator, Division of Invertebrates, Department of Zoology. Janet discussed newly emerging hypotheses of phylogenetic relationships within the cephalopod Order Octopoda. To address questions of monophyly of the Octopoda itself and its subgroups Cirrata (finned octopods), and Incirrata (finless octopods), Janet briefly considered morphological attributes of the related Orders, the Sepioida (cuttle fish), the Teuthoida (squids), before focusing in detail on the outgroupVampyromorpha (vampire squids).



Not unexpectedly, she encountered a number of methodological difficulties. Each group includes taxa that live at depths greater than 3,000 m and are very rarely sampled, and even when collected, individuals are often very badly damaged. She found generic or familial units long believed tocomprise only one or a few taxa to contain large numbers of previously undescribed taxa.

Although there is relatively little controversy concerning placement of taxa within a given suborder, cladistic hypotheses of both inter- and intra-ordinal relationships are lacking, and basal or primitive groups had been defined solely by their primitive character states. In addition to suites of characters that have been traditionally regarded, such as body fins, an external shell, tentacle/arm structure, and anatomy of the central nervous system, Janet brought novel observations of the anatomy of the digestive and circulatory systems to her cladistic analyses. Integration of changes in aortic branch patterns and changes in the organization of the digestive tract allowed her to redefine each of the previously recognized suborders of Octopoda using shared derived character states.

THE VOLUNTEER SPECTATOR

Please welcome new volunteers to The Field Museum in October and November:

VOLUNTEER	*DEPARTMENT*	*SUPERVISOR*
Anu Anttila	Anthropology	Jonathan Haas
Elizabeth Beak	Anthropology	John Terrell and Pamela Stewart
Robert Blasdell	Education	Mary Ann Bloom
Stephen Bugman	Education	Peter Laraba
Helen Burge	Botany	Bill Burger
Aloysius Chen	Anthropology	Ben Bronson
Eileen Fielding	Zoology/Insects	Petra Sierwald
Ruthie Harari-Kremer	Botany	Nancy Hensold
David Hines	Zoology/Mammals	Bill Stanley
Matthew Horning	Zoology/Mammals	Bill Stanley

The Museum Stores Have Special Holiday Gifts!

Main Store (MS): 1st Floor
Children's Store (CS): Ground Floor

Christopher Toft	Development	Friends Group Coordinator	874
Joseph Tully	Accounting	Weekend Cashier	535
Robert Weiglein	Exhibits	Assistant Exhibit Designer (term)	416

GOODBYE AND GOOD LUCK...

Staff Members who left the Museum in November

Theodore Green	Housekeeping	Housekeeper
Janet Kamien	Exhibits	Exhibits Director
Paula Napora	Auxiliary Services	Secretary II
Barbara Novy	Photography	Clerk II (term)
Elizabeth Riegle	Exhibits	Assistant Exhibit Designer (term)
Michael Trombley	Library	MS-Library II

The Holidays are Coming... and so are the crooks!

It's a time for giving ...and a time for taking -

It's a busy time - but even busier for crooks and conmen!

You're filled with the spirit of Goodwill - but don't let your guard down, when you should be especially alert.

For your own security, and for your family and friends' security, please remember:

- Not all delivery men are what they claim to be. Charitable appeals may not be legitimate. You'll see an increase over the holidays. Some of this is a front for crime, used to get into your home or office.
- Be alert for strangers in your building or work area, especially during the times 30 minutes before work, during lunch, or 30 minutes before and after closing. Crooks look for cover during "people moving" hours.
- Don't leave your wallet or purse out. Lock them in your desk drawer. Don't leave wallets in jackets or coats.
- Don't leave those nice gifts out, or in closets, etc. Lock them in you desk or file cabinet or keep your eye on them at all times until you take them home.
- Don't leave your office unattended. Lock your door, even if you're momentarily absent. Thieves cruise this time of year: they'll steal anything.
- When you place your purchases in your vehicle, lock them in your trunk. In station wagons, conceal gifts by covering them - any way to hide them from view.
- If you bring your packages to your vehicle and plan to return to shop, move to another location. Thieves watch for shoppers who bring packages to their cars and return to the store. If you move your car, they'll think you've left.
- Keep your ignition key on a separate key ring. Then parking attendants and others can't open your trunk. If your home or office keys are left with strangers during the day, they could be copied and you could be burglarized while you're away.

The Security Services Staff Wishes You

A Safe and Happy Holiday!
